

It's my future!

The earth is slowly dying,
And the animals started crying
Politicians only want money,
And Bees died and stopped making honey.

The pacific is full of plastic
We need to change something, drastic!
Adults think teenagers can't change anything because of their age
It just makes me rage!

It's *our* future not *theirs*,
We are all scared because no one really cares
In 30 years, we won't have an earth to live on
And all living creatures will be gone.
