

It's my future!

I'm no adult, but I'm also not a child

I want to make change, but they want me quiet

I speak up, but they throw me out, wish I had just smiled

I'm a teen and not okey, that's why I should try it.

Let's start a riot, I need you to listen

It's all about my future, please, don't sush me out

Your laws won't beat me into submission

Give my words meaning, I can't do it without

I'm no adult, but I'm also not a child

Change won't come alone, so send me a hand

Together we can make my future alright

I hope you understand, because of you, my future could be grand.
